STOP!

Before you install this program, read the following instructions.

Certificate of Authentication

The Certificate of Authentication included with the CD bears a unique serial number that you must use to register and operate the program. *Do not throw the Certificate of Authentication away*. Keep it in a safe place with the program CD-ROM.

After you have installed the program, start the program to register it using the Serial Number. The **Add Module** window automatically opens providing a field to enter the Serial Number. Enter the number from the Certificate of Authentication and click **OK**.

After entering the Serial Number, you have seven days to call DMP customer service to register and activate the program. If you do not activate the program within seven days, you can no longer use the program until you properly register and activate the software.

Activating the Program

To activate the program, follow the steps below:

1. Open the Registration window by selecting **Help > Registration**.
2. From the list, select the program you want to activate and click the **Activate** button. This generates a number called a Public Key.
3. Immediately call DMP Customer Service department at 1-800-641-4282 and give them the Serial Number and the Public Key. They will give you an Activation Code.
4. Click **OK** to close the Information window and open the Module Activation Window.

Note: Do not click OK until you are ready to enter the Activation Code.

5. Enter the Activation Code in the Module Activation window and click **OK**.
6. Restart the program. Close the program and then re-open it to use the new module.

The program is now activated and ready to use.

Refer to the program User's Guide for more information.
