Link Customizer

Description

The Link Customizer feature for System Link allows you to fully customize System Link for your customers. Before you customize System Link, the title bar displays *System Link*. After you customize the customer copy of System Link, your company information, logos, and images replace *System Link*.

Link Customizer is shipped with one copy of the System Link program installation CD as well as one customized User's Guide. System Link must be installed using the System Link installation CD, registered, and activated before it can be customized. Each System Link is licensed for one computer. The System Link Customizer can be used to customize an unlimited number of customer System Links.

Artwork

Your Link Customizer CD includes the necessary artwork to customize Link. The artwork included is the binder cover, binder spine, and CD label artwork. The Link Customizer comes with one binder and CD pre-labeled with your company artwork. You are responsible for printing additional copies when necessary.

### Printing Additional Binder Artwork

The binder cover and spine are in one file named binder.bmp or binder.jpeg. The binder artwork is designed to fit a one-inch binder. For best results, print on 11 x 17 inch paper and trim down to the desired size. This allows the binder cover to completely fill the binder front.

Printing Additional CD Labels

The CD Labels are created for standard CD Labels, which can be purchased at most office supply stores. The CD Label file is always named CD.bmp or CD.jpeg. The labels print two-up on a page.

Installation

After using the System Link CD to completely install, register, and activate System Link, insert the Link Customizer CD into the CD-ROM Drive. The Link Customizer CD should automatically begin. If it does not, double-click the setup.exe file on the CD.

A pop-up dialog box asks if you want to customize System Link to "Your Company Name Here." Click **Yes** to customize System Link. When System Link is fully customized, you see a pop-up window telling you "System Link Customized."

When customers run your customized version of System Link, they see your company name in the program title bar. The customers also see your company splash screen when System Link opens and a company logo or image when **Help > About** is selected.

Additional Link Customizer Notes

You may use the Link Customizer CD to customize an unlimited number of registered System Link software programs. Do not burn additional System Link installation CDs. Each System Link copy requires a new license and serial number available only from DMP. You may, however, burn additional Link Customizer CDs.
