

## 342 Enclosure

### Description

The DMP Model 342 Enclosure is designed to house backup batteries. The enclosure dimensions are 11" wide x 5" high x 2.75" deep making it ideal for small spaces.

### UL Listed Installations

- The 342 is for backup batteries only and must be connected to a DMP UL Listed system. The 342 enclosure cannot be used for battery backup when the 350A Grade A Attack Resistant enclosure is required for the control panel.
- The 342 enclosure must be mounted within three feet of the panel enclosure and all wiring between the 342 enclosure and the panel enclosure must be in conduit.

### Mounting the Enclosure

Mount the 342 enclosure in a secure, dry location to protect the batteries from damage due to tampering or the elements. The enclosure is designed for surface mounting. After mounting the enclosure, wiring the batteries, set the included lid in place and secure it with the four mounting screws.

The figure below illustrates the enclosure and lid mounting hole locations for the 342 enclosure.
