WALL OUTLET
(NOT CONTROLLED
BY A SWITCH)

POWER CORD
PORT

QUICK START GUIDE
SecurityGateway™

Once you have logged into your Virtual Keypad App™,
use this guide to power up your gateway.

1 POWER IT UP
Plug the included power cord into the port in the back of your gateway.
Plug the other end of the power cord into a wall outlet not controlled by
a switch.

2 CONNECT TO WI-FI
Push the WPS button on your router to connect your gateway to the
Wi-Fi network. As soon as it's connected, the gateway will begin the
auto-programming process. Your app will display the Programming
System screen.

3 CONTINUE TO THE NEXT STEP
Refer back to your Virtual Keypad App™ and move on to plugging in your
keypad and pairing it to your gateway.
