# SecuraTouch™

1. ATTACH THE DESKSTAND

The SecuraTouch keypad is designed to be placed on a tabletop or other flat surface.

- ✓ Attach the keypad deskstand by pressing the slide lock on one of the stand legs into the square opening located on the back of the case **A** .
- ✓ Slide the leg upward until the top ridge seats.
- ✓ Repeat the process to attach the second side of the deskstand.

2. POWER IT UP

- ✓ Plug the USB end of the cable into the power supply adapter **B** .
- ✓ Plug the power supply adapter into an outlet **C** .
- ✓ Plug the micro USB end of the cable into the back of the keypad **D** .

3. AUTO PAIR

When you power your SecuraTouch and SecuraHub™, the auto pairing process begins immediately and a 10-minute auto pairing timer starts. The keypad automatically displays **Pairing Keypad With System** **E** .

If the hub acquires the keypad during the 10-minute auto pairing time period, you will see the home screen display on the keypad, signaling that pairing is complete **F** .

If the hub does not acquire the keypad by the end of the pairing timer, the keypad displays **Pairing Failed**, followed by the **Reset** screen **G** . Press the RESET button on the hub and the **Pair** button on the keypad to restart the pairing process.

If the keypad loses communication with the panel, the **No Communication With System** display appears and gives you the option to reattempt pairing **H** .
