

QUICK START GUIDE

SecuritySensor™ Carbon Monoxide

Once you have logged into your Virtual Keypad App™ and plugged in your keypad, use this guide to install your carbon monoxide (CO) detector.

1 PLACE THE CO DETECTOR

Place your CO detector on a ceiling in the center of a room, or on a wall 4-12 inches below the ceiling. If possible, place it in a hallway near bedrooms.

1. Twist the CO detector to remove it from its mounting base.
2. Use the two provided screws and anchors to mount the base.
3. Press the test button. The green LED turns off and the red LED turns on continuously.
4. Reattach the detector to the base by lining up the tab on the lip of the detector with the slot on the lip of the mounting base and rotating until it clicks into place.

2 CONTINUE TO THE NEXT SENSOR

Continue installing the rest of your sensors, then select the Continue button on the Virtual Keypad App™ to add a user code and complete the installation.
