XT Series

Overview

The XT Series provides a range of intrusion panels that are richly featured and perfectly priced for larger residential and small retail markets. The XT75 seamlessly integrates intrusion, access control and AlarmVision® — making it ideal for customers who need a robust system with a small footprint.

Talking Points

Integrated System Simplifies Operations

An integrated system gives you the full benefit of multiple security features, all working together. Intrusion, access and video features working together makes installation, programming and servicing easier. Reduce potential points of failure and streamline your business operations — eliminating wasted revenue.

Convenient to Manage with Virtual Keypad™

The ultimate in flexibility and convenience, Virtual Keypad app or browser allows you to manage your security system from anywhere in one simple interface.

Trusted Wireless

Our 900 MHz spread-spectrum Two Way Wireless is tried and true. As the industry's longest-range wireless with the widest selection of products for its class, millions of units have been installed in the field by countless dealers who rely on secure, powerful wireless for their customers.

XT75 Delivers Premium Features in a Small Footprint

- Robust access control that's simple to use
- Compatible with AlarmVision technology
- Faster installs with built-in wireless

AlarmVision

The XT75 is compatible with AlarmVision products, giving you the ability to monitor real events in real time with a real response. XV Gateways with AlarmVision turn cameras into intelligent motion detectors and significantly reduce costly false alarms.
