Keypads Product Overview

INTUITIVE BY DESIGN

*DMP keypads are designed to make security easier for users and more profitable for dealers. From intuitive prompts that reduce false alarms to visual alarm indicators like the **Red Keypad**, customers can quickly understand what is happening and what action to take. **Backwards and forwards compatibility** helps you upgrade without replacing the entire system, extending panel life and protecting your customer's investment. **Branded keypad** options keep your logo and contact information front and center, with easy updates anytime and secure protection against third-party takeovers. **Built in the U.S.** and tested before shipping, DMP keypads deliver the reliability, consistency and support dealers can count on.*

SELLING KEYPADS

BENEFITS TO DEALERS

- Backwards/Forwards Compatibility with DMP panels
- Customizable with your logo

BENEFITS TO END USERS

- Patented alarm confirmation process reduces false alarms
- Red Keypad provides visual warning of an alarm in-progress
- Intuitive, easy-to-use features

KEY DIFFERENTIATORS

Designed, engineered and manufactured in the U.S. with U.S. and global component

100% of products manufactured by DMP are tested before they're shipped

Backwards/forwards compatibility increases system life span

Options for full brand customization increase brand awareness and prevent takeovers by competitors

DMP DIFFERENTIATORS

REDUCE FALSE ALARMS

Most systems cancel an alarm as soon as a user enters a code. DMP systems ask for confirmation – silencing the siren while keeping the alarm active. This patented process prevents real emergencies from being unintentionally cleared and helps to greatly reduce false alarms.

RED KEYPAD

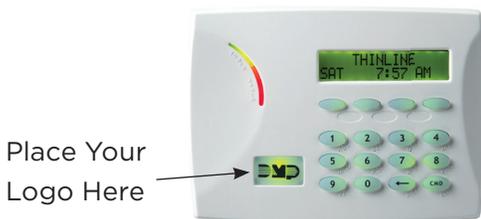

During an alarm state, the screen or keys (depending on the model) turn red. The red lighting remains until reset, providing a visual warning of potential danger to anyone entering the building.

BACKWARDS/FORWARDS COMPATIBILITY

No need to replace an entire system. With backward and forward compatible products, your customers can enjoy all the features of a newer keypad while keeping their existing control panel. Save on cost and improve longevity by upgrading components when you want to, not when you have to!

PROMOTE YOUR BRAND WITH CUSTOMIZED KEYPADS

Put your brand in front of your customers – and in their pockets, with custom keypads and credentials. Choose options for Basic and Fully Customized 5- and 7-inch Touchscreen Keypads and branded silicone inserts for Thinline Keypads. Contact PrivateLabel@DMP.com to learn more.

BASIC CUSTOM TOUCHSCREEN KEYPADS

Add your logo and contact information to the touchscreen interface and update it anytime. Customers instantly know who to contact for support while your brand stays front and center.

5-Inch Graphic Keypad (logo and contact information screen)

- Visit dmp.com/privatelabel to start the process
- \$85 setup fee, receive 3 micro SD cards with logo and contact information
- \$85 for 10 additional micro SD cards

7-Inch Graphic Keypad (logo and contact information screen)

- Upload dealer logo (270px x 110px PNG file) and enter the dealer information into Dealer Admin under 8860 Private Label Settings
- Free!

FULLY CUSTOM BRANDED TOUCHSCREEN INTERFACE

Build an entirely custom interface design for your 5-Inch or 7-Inch Touchscreen Keypads. Our Product Design and Marketing teams will work with you to develop a keypad interface that complements and highlights your brand.

- Visit dmp.com/privatelabel to start the process
- Prevents takeovers – custom branding cannot be overwritten by third parties
- Fully custom-branded animated interface to enhance brand recognition

8860 7-Inch Touchscreen Keypad Models 8860-W, 8860-B, 8860POE

KEYPAD OVERVIEW	The 8860 represents DMP's most advanced touchscreen interface. With a 7-inch capacitive display, voice annunciation, Bluetooth disarming and integrated video capabilities, it serves as a comprehensive security and automation hub suited for premium residential and commercial installations.
CORE FEATURES	<ul style="list-style-type: none">• 7" capacitive multi-touch display• Red alarm screen• Voice annunciation for zone activity• Bluetooth disarming• Built-in camera for arm/disarm photos• Live and recorded video viewing• Two-way audio for video doorbells• Wi-Fi communication• POE option for single-cable installation• Weather display• Customizable carousel menu• Z-Wave control of lights, locks and thermostats• Event filtering and sorting• Dealer branding synced through Dealer Admin
BEST FOR / IDEAL INSTALLATIONS	<ul style="list-style-type: none">• Luxury residential environments• Commercial sites needing interactive video features• Applications requiring Bluetooth convenience• Modern spaces where a premium display elevates the user experience
TARGET AUDIENCE / MARKET	<ul style="list-style-type: none">• Tech-forward homeowners• Retail, hospitality, small business and office environments• Users who value high visual clarity and touchscreen control
WHEN TO CHOOSE THIS PANEL	Choose the 8860 when you need the most advanced, interactive keypad with integrated video, Bluetooth disarming, and a fully modern touchscreen interface.
DEALER BENEFITS	<ul style="list-style-type: none">• Remote dealer branding• Remote updates• POE simplifies wiring and increases connection security• Wi-Fi support broadens compatibility• Event photo capture improves verification• Video and doorbell integration increase system value• Replaces multiple devices with one unified interface
KEY DIFFERENTIATORS	<ul style="list-style-type: none">• Largest display in the lineup• Only keypad with Bluetooth disarming• Only keypad with two-way doorbell audio• Integrated camera• Full Z-Wave control• Customizable interface with dealer branding

5-Inch Touchscreen Keypads

Models 7800 / 9800 Series (7872, 7873, 7873H, 9862, 9862USB)

KEYPAD OVERVIEW	The 5-inch Touchscreen Series introduces a responsive, full-color graphical interface paired with powerful system control features. With a customizable carousel, interactive arming shield and proximity support, these keypads offer a more modern and dynamic way to manage security systems.

<p>TARGET AUDIENCE / MARKET</p>	<ul style="list-style-type: none"> • Homeowners seeking a classic aesthetic • Commercial customers with ‘mixed’ credential technologies • Retail, office, education and hospitality environments
<p>WHEN TO CHOOSE THIS PANEL</p>	<p>Choose Aqualite when you need a visually distinctive, blue-lit interface with expanded proximity compatibility and optional onboard zones.</p>
<p>DEALER BENEFITS</p>	<ul style="list-style-type: none"> • Seven additional proximity formats supported • Same footprint as legacy DMP keypads • Built-in diagnostics for quick servicing • Multi-keypad installation efficiencies • Simplified user training with shortcut keys
<p>KEY DIFFERENTIATORS</p>	<ul style="list-style-type: none"> • Unique blue-to-red backlighting • Multi-format proximity support • Optional Wiegand input and relay (7073A) • Clean, visual presentation

630F Fire Command Keypad

<p>KEYPAD OVERVIEW</p>	<p>The 630F Fire Command Keypad provides a clear, text-based interface designed for fire system control and annunciation. With a 32-character full text LCD, plain-English system messages and dedicated fire function keys, it delivers fast, confident response during alarm and trouble conditions. The built-in keyswitch supports single-button operation for critical functions, while flush or surface mount options provide flexibility for clean, code-compliant installs.</p>
<p>CORE FEATURES</p>	<ul style="list-style-type: none"> • 32-character full text LCD display with plain-English events and prompts • Dedicated Fire Command functions: Alarm Silence, System Reset, System Test and Fire Drill • Factory-installed keyswitch enables single-button operation • AC Power, Trouble and Alarm LEDs for at-a-glance status • Built-in diagnostics for service and troubleshooting • Two-button panic keys
<p>BEST FOR / IDEAL INSTALLATIONS</p>	<ul style="list-style-type: none"> • Fire alarm control points needing simple, fast command access • Facilities requiring plain-English event visibility at a remote annunciation location • Sites where flush or surface mounting is needed to match wall type and conduit requirements
<p>TARGET AUDIENCE / MARKET</p>	<ul style="list-style-type: none"> • Fire alarm and life safety dealers • Commercial environments needing a dedicated Fire Command keypad • Customers who want clear, no-training-required event and status visibility
<p>WHEN TO CHOOSE THIS PANEL</p>	<p>Choose the 630F when you need a durable, text-driven Fire Command keypad with one-button access to key fire functions, clear status LEDs and flexible mounting for professional fire installations.</p>
<p>DEALER BENEFITS</p>	<ul style="list-style-type: none"> • Easy installation with simple harness connection to the 4-wire keypad bus • Built-in diagnostics support faster troubleshooting and fewer return visits • Optional backboxes improve install efficiency across different wall and conduit needs
<p>KEY DIFFERENTIATORS</p>	<ul style="list-style-type: none"> • Fire Command keyswitch for single-button operation of critical functions • Plain-English event display on a 32-character LCD for fast decision-making • Dedicated status LEDs: AC Power, Trouble and Alarm

630F

7830F-R

7830F-R Graphic Remote Annunciator

KEYPAD OVERVIEW	<p>The 7830F-R Graphic Remote Annunciator delivers a modern touchscreen experience built specifically for fire applications. With a 5-inch display, a clear system status list, an internal speaker and a three-state LED status indicator, it helps users quickly understand alarms and take action. A carousel menu provides fast access to critical fire functions like Silence, Reset, Drill, Events and Test. The annunciator mounts cleanly on common electrical boxes or flat surfaces for flexible installations.</p>
CORE FEATURES	<ul style="list-style-type: none">• 5-inch touchscreen interface with system events and prompts• 3-state LED status indicator: no LED (normal), solid red (alarm) and flashing red (silenced)• Carousel menu options for fast operation with an authorized code:<ul style="list-style-type: none">• Silence, Reset, Drill, Events, Keypad, Options, Test, User Codes• microSD card slot supports dealer logo and dealer info upload• Flexible mounting: 4" square box, 3-gang switch box, compatible backboxes or flat surface
BEST FOR / IDEAL INSTALLATIONS	<ul style="list-style-type: none">• Fire sites needing modern remote annunciation with an intuitive touchscreen interface• Locations where fast access to Silence, Reset, Drill and Test improves response time• Facilities that benefit from a clear visual and audible status experience with a touchscreen, speaker and LED indicator
TARGET AUDIENCE / MARKET	<ul style="list-style-type: none">• Fire and life safety dealers installing XF6 and XR Series fire-capable systems• Commercial facilities needing a remote annunciator with a premium user experience• End users who need quick, guided access to key fire commands with minimal training
WHEN TO CHOOSE THIS PANEL	<p>Choose the 7830F-R when you want a touchscreen Fire Command annunciator that improves speed and clarity during events, provides a visible LED status indicator and offers guided, menu-based access to key fire functions.</p>
DEALER BENEFITS	<ul style="list-style-type: none">• Dealer logo and dealer info options support branding and service visibility• Clear status list, LED state indicator and internal speaker reduce confusion and service calls• Supports supervised or unsupervised annunciator deployment, panel-dependent, for flexible expansion
KEY DIFFERENTIATORS	<ul style="list-style-type: none">• Touchscreen Fire Command experience with a fast-access carousel menu• Dedicated LED status behavior for alarm and silenced states• Fire-only design focus supports clearer workflows and compliance-driven installs• Dealer branding capability via microSD logo and info upload

THE SMARTEST WAY TO **SEE,** **CONTROL** AND **SECURE** **EVERYTHING.**

No matter the space or user, there's a DMP keypad designed to deliver the right experience. From reliable LCD models to modern touchscreens, our lineup helps dealers match the right interface to the job while giving customers a system that's simple to use and built to last.

The **8860** takes it further, combining **premium touchscreen control** with **video, automation and smart convenience** in one keypad.

Choose what fits the install

- **LCD keypads** for straightforward, familiar control
- **Icon keypads** for simple, visual operation
- **5-inch touchscreen keypads** for modern interaction and flexible features
- **8860 7-inch touchscreen** for the most advanced experience, including video and automation

Why DMP?

U.S.-BASED MANUFACTURING, SUPPORT AND SERVICE

The factory, call center, engineering and distribution are all located in Springfield, Missouri, right where the business began in 1975. Average Technical Support hold times are the shortest in the industry and the distribution center ships most orders same day.

ROCK SOLID RELIABILITY

100% of products manufactured by DMP are tested before they're shipped. Every product. Every time. This means that DMP products work right out of the box—ensuring faster installations and fewer service calls.

CUSTOMER-DRIVEN SOLUTIONS

As a dealer, your continuous feedback is valuable. You can count on a culture of responsiveness, where innovation is customer driven. Listening and anticipating needs leads to effective solutions that deliver benefits to everyone.

DMP PRODUCTS CUT LABOR COSTS AND MULTIPLY YOUR EFFORT

Products are developed with your operations in mind. Your operational efficiencies inspire us to create systems that reduce labor, increase RMR and reduce false alarms. These systems include features like backwards/forwards compatibility, best-in-class wireless range and functions that extend battery life.
