MORE FEATURES. MORE ANGLES. MORE SECURITY.

Your cameras should do more than just keep watch. Enhance your security with cameras that are a critical part of your alarm system, offering sharper images, person and vehicle detection, faster alarm response and built-in deterrence. With specialty lens options to cover every need, your proactive camera solution is waiting for you.

- Full-color imaging in ultra-low-light conditions
- Specialty lenses with high-resolution video
- Real alerts in real time
- Powerful deterrence lighting and two-way audio
- Take action from anywhere, at any time, with Virtual Keypad™

HIGH PERFORMANCE FROM EVERY ANGLE

Never sacrifice the perfect view with varifocal, panoramic and fisheye lenses. From fine-tuned magnification to a 360° field of view, blind spots aren't an issue. 6MP, 8MP and 12MP resolution cameras offer clear, detailed video, so you'll know exactly what you're looking at and how to respond. Faster, more confident alarm verification means faster response when you need it most.

THE RIGHT ALERTS AT THE RIGHT TIME

Get cutting-edge detection and deterrence technology with AlarmVision®. No sorting through hours of passive footage. No annoying alerts. No false alarms. Just the activity you want to know about, as soon as it happens. Detect people and vehicles, create areas of access and more. Cameras trigger your alarm panel based on your personalized system settings, and analytics that know when your system is armed help deliver smarter alerts and support 24-hour monitoring.

DETER UNWANTED ACTIVITY

Intervene in suspicious events before they escalate. If cameras detect unwanted activity, select models use powerful red and blue or white deterrence lights to prevent further action. Two-way audio, with a built-in microphone and speaker, gives you the power to respond directly to activity from anywhere. Speak with visitors and hear responses from your smartphone.
