

Hardware Update

Effective April 2023, all 1106 Wireless Universal Transmitters are shipping with Level 101 Hardware and Version 201 Firmware.

Improvements

This update allows all 1106 transmitters to be programmed using encrypted or unencrypted communication. To enable encryption, wireless receivers must have Version 300 firmware or higher.

Note: The 1106E part number has been discontinued.

Obtaining the New Hardware

New 1106 Wireless Universal Transmitters with Level 101 Hardware and Version 201 Firmware can be ordered by contacting DMP Customer Service at 1-866-266-2826 or by visiting buy.dmp.com.
