Version 108 Update

734 Series Access Control Modules are now being manufactured with firmware Version 108 (6/15/25).

OSDP Support

This update allows 734 Series Access Control Modules to receive and send updated OSDP commands to OSDP enabled readers, along with the ability to enable OSDP and program the OSDP Passphrase remotely.

To use the updated OSDP features, XR Series firmware Version 253 (8/22/25) is required. For more information, refer to TU-1477 and TU-1498.

Get the New Firmware

734 Series Access Control Modules with firmware Version 108 can be ordered by contacting DMP Customer Service at 1-866-266-2826 or by visiting buy.dmp.com.
