

## **TECHNICAL UPDATE | JANUARY 2026**

### **Version 255 Update**

Updated Version 255 (1/21/26) firmware is now available for XR Series Control Panels.

#### **Network Connection Improvement**

Previously, after sending **Communication** programming changes to the panel, in some instances the panel did not reconnect to network until the panel was reset. Now, the panel correctly remains connected to network after sending programming changes.

### **Obtaining the New Firmware**

XR Series firmware updates are available, free of charge, on Dealer Admin ([dealer.securecomwireless.com](https://dealer.securecomwireless.com)) or for download from DMP's [Product Software Downloads](#).
