Version 255 Update

Updated Version 255 (1/6/26) firmware is now available for Com Series Universal Alarm Communicators.

Hexadecimal Zone Numbers

Hexadecimal zone numbers in CID messages are now being converted to decimal before being sent to the monitoring center.

Communication Socket

After communication has stopped, the panel now properly closes the communication socket to be re-used for the next communication.

Obtaining the New Firmware

Com Series firmware updates are available, free of charge, on Dealer Admin (dealer.securecomwireless.com) or for download from DMP's Product Software Downloads.
