Version 263 Update

Updated Version 263 (6/30/26) firmware is now available for XR150/XR550 Control Panels.

7883 Keypad Support

XR150/XR550 panels now support the 7883 Graphic Touchscreen Multi-Technology Keypad.

Refer to the 7800 Series Graphic Touchscreen Keypad Installation and Programming Guide for more information about the 7883 keypad.

734E Encrypted Access Control Module Support (XR550 Only)

XR550 panels now support the 734E Encrypted Access Control Module. Sixteen (16) doors of access can be programmed per AX-Bus, to a maximum of eighty (80) 734E modules, using additional feature keys.

The following programming fields display at the keypad:

1. At the keypad, enter **6653** (PROG) and select **CMD** to enter the programming menu.
2. Go to **NETWORK OPTIONS**.
3. At **734N PASSPHRASE**, enter an 8 to 16-character Passphrase to encrypt communication with the 734E module. The Passphrase is **blank** by default. A passphrase is required for operation.
4. Go to **DEVICE SETUP**.
5. At **ENCRYPTED?**, select **YES** to enable encryption for the 734E. Select **NO** to leave encryption disabled for the 734E.

Note: Encryption is only available for devices connected to the AX-Bus. If encryption is enabled, all devices connected to the AX-Bus are encrypted.

More Information

Refer to the following documentation for more information regarding the installation and programming of a 734E:
